

Public Information Notice

Sea Pen Construction on former Hemlock Mill Site

From mid-April to end of July, Poseidon Ocean Systems will be constructing 5 sea pens for Grieg Seafood in the former Hemlock mill site.

Once completed, the pens under construction will be towed out to fish farms in Nootka Sound to replace the current pens. Eight truckloads of construction material will be hauled in as well as four sea cans. Poseidon is ensuring there is appropriate perimeter and site security, with additional personnel.

The Hemlock mill site is zoned "Industrial -2". This use is consistent with the current zoning which permits barge loading and freight handling and commercial marina facilities.

Information about Poseidon Ocean Systems is available on its website: www.PoseidonOS.com
