

VILLAGE OF TAHSIS

Notice

Sewer Mains Smoke Testing June 12-16

During the testing period white, non-toxic odorless smoke may be visible near manhole covers and other areas in the Village.

Although unlikely, there is a slight possibility that smoke may enter homes through basement bathrooms. To prevent this, property owners are encouraged to run their household water taps, especially in bathroom basements and flush toilets before Monday June 12.

CCTV inspection of the sewer mains will follow once the smoke testing is completed.

For further information call the Village Office at 250-934-6344. (After hours, please call (250)934-6344 and press "9" to leave a message on the radio system)
