

NOTICE TO RESIDENTS

PROTECTING VILLAGE WASTEWATER SYSTEM DURING COVID-19

With the focus on sanitizing surfaces, consumers are buying more “flushable” antiseptic wipes or similar products. **Despite earlier requests, residents are continuing to flush these items.**

DO NOT FLUSH THESE ITEMS DOWN THE TOILET!

These items do not disintegrate into pulp and seriously affect or damage the Village’s wastewater treatment plants by building up, attracting other solid materials, clogging pipes and treatment plant equipment when they are flushed.

Everyone expects their homes to function with the public utilities provided by the Village, especially during these challenging times. Repairing clogged sewer lines means resources are unnecessarily stretched when the focus is on maintaining essential services.

This reminder is to avoid disruptions to sewer system operation, damage to infrastructure, downtime for removal of impactions, safety of Village personnel and the inconvenience to residents and other members of the public.
