

Northwest Vancouver Island Tsunami Risk Project Public Information Meeting Narrative Mapping and Hazard Information

If you live in or regularly visit anywhere on the west coast between Gold River and Cape Scott Provincial Park, then please join us in a virtual engagement session to see the new northwest coast tsunami inundation maps. This meeting will include a presentation by Northwest Hydraulic Consultants and Ocean Networks Canada of tsunami mapping followed by an interactive question and answer period.

In this meeting we will:

- Share our work completed
- Discuss our next steps
- Most importantly – hear your thoughts and feedback!

We've scheduled several dates so please join us at a time that works for you. No preregistration is required, just show up.
