To Whom It May Concern,

Surespan Construction is currently working on the replacement of the Heber River Bridge for the Ministry of Transportation and Infrastructure. The Heber River Bridge is located approximately 10 kms East of Gold River on Provincial Highway #28, British Columbia.

As part of the continued work, Surespan will need to complete a full closure of the bridge between the hours of 11am and 1pm on November 27th and November 28th, 2021. This specific closure is required to be able to remove the old bridge structure to make way for construction of a new structure. Traffic, with the exception of emergency vehicles, will not be able to cross the bridge during the hours above.

If an emergency vehicle is required to cross the bridge, Surespan will work diligently to remove crew and equipment from the detour bridge to facilitate crossing. Please keep in mind that this process may take a little time to complete but we will endeavor to do so as fast as possible.

Thank you in advance for your cooperation as we work to complete the project as fast as possible.

Kind regards,
Steven Wilson | Project Manager
