

The Rural Community Resilience Project needs your help!

Things have been very difficult across British Columbia over the past few years, due to the COVID-19 pandemic, wildfires, heat domes and flooding.

We are a team of researchers from the Centre for Rural Health Research, Department of Family Practice, University of British Columbia. We have observed community resilience and ingenuity in response to these challenges. Yes, it has been a difficult time, but many have risen to the occasion. We would like to better understand the resilience that we have seen and recognize the best way to do this is through the voices of British Columbians. This survey is intended to help us understand in more depth resilience across British Columbia.

We need your help! By answering this (completely anonymous, voluntary) survey, you will be providing insight into resilience, and the information you give us will be used to help British Columbian communities and other places become more resilient. The survey should take no more than 30 minutes and if you wish you may be entered into a prize draw for one of five \$200 gift cards of your choice.

In order to complete the survey, please go to this online web address:

https://ubc.ca1.qualtrics.com/jfe/form/SV_eXU5bCCzwhMzWZw

Or you can also scan this QR code to be taken to online access:

The survey will remain open until February 27th, 2022.

If you have any questions about this survey, or any difficulty accessing the site, please email the Research Coordinator, Claire Styffe at claire.styffe@ubc.ca.

The study is funded by the SPOR BC SUPPORT Unit and the principal investigator is Dr. Jude Kornelsen. To learn more you can visit our website here:
