## Construction Notice

Berry and Vale Contracting Ltd has entered into a contract with the Village of Tahsis to install approx 800 meters of sewage force main, lift station upgrades, various upgrades to the South Wastewater Treatment Plant, and demolition of the North Treatment Plant tank . This work will consist of digging trenches, welding and installing pipe, back filling and compacting the trenches, and paving the disturbed surfaces.

Starting on Wednesday, May 8 we will be performing existing utility locates along South Maquinna Drive and Head Bay Rd. This will require a small crew and a Vac Truck, with periods of single lane alternating traffic. We expect this portion to take 1 day.

To execute the pipe installation in a safe and timely manner we will be running single lane alternating traffic. This includes work under the bridge. The mainline work zone is from the yellow gate at the old mill site to the East side of the Head Bay Rd Bridge. Please do not enter the work zone or approach active equipment and be mindful of large trucks as sight lines around the work zone may be limited. Please avoid parking on any road shoulders during typical working hours. All work impacting traffic is expected to last from mid-May to late-June. Typical working hours will be Monday-Friday, 7am- 5pm.

We are happy to provide stand-down accommodation for special activities that may be impacted by noise (funerals/ceremonies). We will show all residents the utmost respect and would appreciate the same in return. Please do not hesitate to contact me directly with any questions or concerns regarding the project, including any suspicious activity or imminent safety issues. A phone call or text to my number below will be the most effective line of communication. The Village of Tahsis contact for this project is Alisa Vanderberg (250-202-5650). We look forward to spending time in your beautiful community and plan to execute the work in an efficient and respectful manner.
