

NOTICE TO RESIDENTS

PROTECTING VILLAGE WASTEWATER SYSTEM FROM “FLUSHABLE” WIPES OR SIMILAR PRODUCTS

DO NOT FLUSH THESE ITEMS DOWN THE TOILET!

These items do not disintegrate into pulp . Flushing wipes seriously damages the Village’s wastewater treatment plants by building up, attracting other solid materials, clogging pipes and treatment plant equipment.

This reminder is to avoid disruptions to sanitary sewer system operations, costly damage to infrastructure, downtime for removal of impactions, safety of Village personnel and the inconvenience to residents and other members of the public.

Everyone expects their homes and businesses to function with the public utilities provided by the Village. Repairing clogged sewer lines means resources are unnecessarily stretched with the focus is on maintaining essential services.

Thank you for your cooperation.
