

Village of Tahsis

COMMUNITY BOAT LAUNCH UPDATE

The Village terminated our Contract with Black Creek Industries Ltd. on the Community Boat Launch project on July 15th, 2026. The Village plans on undertaking the installation of the floats as a separate expedited project with a different contractor, with installation expected in September. The washroom component of the project has been deferred to this fall or next spring.

The boat launch is available for use by the public; however, we caution boaters using the launch at extreme low tides due to a small amount of remaining material that exists off the end of the launch which is 1-2 feet higher than the lowest elevation of the concrete pad end. We will be undertaking additional work in August to remove that material.
